Introduction:

This work package aims to provide suitable and innovative training and technology transfer and innovations among the network stakeholders and higher education institutions. Through improve the trainee skills required for their current job by participating and joint in different training programs.

Description of the activities:

Suez Canal University, in cooperation with the governmental agricultural sector and the private agricultural sector (Partner No. 10 and No. 11), organizes a series of training courses for those interested in the plant clinic and the agricultural sector.

These courses aim to communicate with society and increase awareness and agricultural culture among the public.

The university leaders and the plant Clinic Project Coordinator supervise the preparation and organization of these courses in appointing specialists and those have skills and experience in the field of each training program. Some of these training programs take place outside the university, where the training team is transferred to the beneficiaries. Others training programs are implemented inside Suez Canal University by inviting those interested trainees in these courses, and these courses are announced through social media pages.
